AI Engineer at Nimble Gravity with 3 years of experience building software that runs in production, most recently RAG systems and LLM agents with LangGraph and MCP. Co-founded a software company as CTO and built a SaaS used by 10+ small businesses. Comfortable across the stack: FastAPI, React, TypeScript, PostgreSQL, AWS and Azure.

EXPERIENCE

AI Engineer

Nimble Gravity

Jul 2026 – Present

Bogotá, Colombia (Remote)

- Build generative AI solutions for clients, mostly RAG and semantic search over company documents.
- Develop agents with LangGraph and MCP that process documents and automate parts of business workflows.
- Extract structured data from PDFs, emails, spreadsheets and images, running on Azure and AWS.

Co-Founder & CTO

Tech Craft Solutions

Jun 2025 – Jun 2026

Bogotá, Colombia

- Co-founded a small software company building custom AI and web solutions; chose the architecture and led development on each client project (FastAPI, React, LangGraph, PostgreSQL).

Software Developer & AI Tools Developer

Dantalabs (now Vadian)

Mar 2025 – Jul 2026

Bogotá, Colombia (Remote)

- Built full-stack applications with FastAPI, React, TypeScript, Docker and PostgreSQL.
- Developed AI agents and multi-step workflows in LangGraph, plus the backend APIs behind them.
- Built MCP servers that connect AI tools to Microsoft Copilot; deployed and monitored them in production.

Software Developer & Data Architect

SAM | Automated Meteorological Services

Dec 2024 – Dec 2025

Bogotá, Colombia

- Co-designed a weather forecasting platform for solar energy systems with Python, Pandas and Open-Meteo.
- Built the React dashboards and the Django REST backend, deployed on AWS (EC2, RDS, S3, Lambda).

Full Stack Developer

Dataexco

Aug 2023 – Dec 2024

Duitama, Colombia

- Led the migration of a legacy academic system to a new web platform built with Django and MySQL.
- Built the frontend and internal tools used by academic and administrative staff.

PROJECTS

OrbitEngine | *FastAPI, React, TypeScript, PostgreSQL, Railway* | orbitengine.lat

Nov 2025 – Apr 2026

- Built and launched a multi-tenant SaaS that 10+ small businesses use to manage inventory, clients and sales.
- Added real-time low-stock alerts and daily sales dashboards; handled design, deployment and maintenance.

Coastal Jurisprudence AI Agent | *RAG, LangGraph, FastAPI, Next.js, Chroma, Ollama, Firebase*

Mar 2026 – Jun 2026

- RAG assistant that lawyers use to search and ask questions about Colombian coastal jurisprudence.
- Built the PDF ingestion pipeline (Docling, Ollama embeddings, Chroma) and the LangGraph flow that answers questions; Firebase for auth and chat history.

EDUCATION

Sergio Arboleda University

Computer Science and Artificial Intelligence Engineering

Bogotá DC, Colombia

Feb 2022 – Sep 2026

- Graduated Cum Laude. First, Second and Third Distinction in the “Rodrigo Noguera Laborde” Honors Program.
- Member of the “Software as Innovation” research group (Feb 2025 – Jun 2026).

SKILLS & CERTIFICATIONS

AI & Data: LangGraph, RAG systems, MCP, Claude API, Embeddings, LLM Evaluation, Chroma, Ollama, Pandas, NumPy

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS, Golang

Web: React, Next.js, TailwindCSS, TanStack, ShadCN, FastAPI, Django, Node.js

Cloud & DevOps: Docker, AWS (EC2/RDS/S3/Lambda), Azure, Railway, Google Cloud Platform

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Certifications: Claude Certified Developer - Foundations (Anthropic, Aug 2026)
